EDUCATION

Towson University

Bachelor of Science in Computer Science (3.95 GPA), Minor in Mathematics

Towson, MD

May 2026

- **Coursework:** Object-Oriented Design and Programming, Software Quality Assurance and Testing, Web App Development, iOS App Development, Machine Learning, Calculus III, Ordinary Differential Equations, Linear Algebra, Discrete Math, Statistical Methods

TECHNICAL SKILLS

Programming Languages: TypeScript, JavaScript (Node.js), Python, Java, Swift, C++, HTML, CSS, SQL, LaTeX

Frameworks/Technologies: Express, Mongoose, Jest, Supertest, JUnit, React, Angular, Tailwind, Bootstrap

Databases: MongoDB, MySQL

Developer Tools: Git, Postman, Docker, CircleCI, Visual Studio Code, Eclipse, Github, Gitlab

EXPERIENCES

Uber

Software Engineering Intern

Sunnyvale, CA

May 2025 to Present

- Incoming Summer 2025

SecurEd Inc.

Junior Software Developer

Towson, MD

Aug 2024 to Present

- Advancing cybersecurity education by developing CLARK, CARD, and Cyber Competencies—platforms serving 14,000+ active users and facilitating 56,000+ curricula downloads
- Build and maintain scalable RESTful APIs and a web application using the MEAN stack
- Write extensive unit and end-to-end tests using Jest and Supertest
- Create Python scripts that efficiently query and manipulate data for production environments
- Help facilitate sprints, standups, and team retrospectives
- Create and manage epics and stories for feature, chore, and bug tasks
- Leverage Git and GitHub for version control, ensuring efficient team collaboration

Towson University

Computer Science Peer Tutor

Towson, MD

Feb 2024 to Dec 2024

- Provided drop-in tutoring up to 250 students every semester in Java, Python, and C++
- Assisted students with understanding the concepts and principles in data structures, algorithms, structured, procedural and object-oriented programming

Towson University

Undergraduate Researcher in Federated Learning

Towson, MD

Aug 2023 to Jan 2024

- Conducted research on model poisoning in Federated Learning systems under Dr. Weixian Liao
- Utilized the Flower Federated Learning (FL) framework (TensorFlow) to conduct experiments of vulnerabilities to model poisoning attacks in federated learning
- Compared FL aggregation methods FedAvg, FedProx, and QffedAvg across varying types of model poisoning attacks during data processing and model training

Towson University

Research Intern

Towson, MD

June 2023 to July 2023

- 1 of 12 students chosen for the TIGURS summer undergraduate research program
- Utilized PyTorch, NumPy, pandas, Matplotlib, and scikit-learn to simulate feed-forward, convolutional, and recurrent neural networks using the MNIST and CIFAR-10 datasets
- Evaluated experiments based on Accuracy, Confusion Matrix, Precision, and Recall

PROJECTS

Towson Academic Pathway

Sept 2024 to Dec 2024

- Developed a web application using the MERN stack and Tailwind CSS to streamline and ease the academic planning process for Towson University students
- Integrated the OpenAI API to generate personalized degree plans tailored to student preferences
- Applied best software engineering practices like continuous integration with CircleCI and interface-driven design

nVolve

Sept 2024 to Dec 2024

- Developed an iOS app in Swift to enhance student engagement with Towson University campus events
- Utilized Alamofire to fetch event data from API endpoints
- Integrated an interactive campus map to display real-time event markers using MapKit and CoreLocation
- Implemented local push notifications to keep students updated on upcoming events

Nonlinear ODEs and Linear PDEs Equivalence Project

March 2024 to May 2024

- Researched the equivalence between nonlinear ordinary differential equations and linear partial differential equations in fluid dynamics
- Utilized Python frameworks such as NumPy, SciPy, and Matplotlib for simulation and visualizations
